SUMMARY

Results-driven web developer and founder of Codeferd Digital with a strong foundation in modern web design and full-cycle development. I specialize in translating business needs into fast, responsive, and secure websites. From delivering high-stakes government platforms to building custom web solutions, I excel at remote collaboration, problem-solving, and managing projects from the first line of code to post-launch scaling.

TECHNICAL SKILLS

Front-end Development:	HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS
Backend & Databases:	Node.js, Express.js, MongoDB
Infrastructure & Security:	Web Hosting, Domain Management, SSL/TLS Implementation, Website Performance Optimization, Uptime Monitoring
Professional Skills:	Remote Project Management, Client Communication, UI/UX Implementation, Technical Troubleshooting

EXPERIENCE

Codeferd Digital — Freelance Web Developer & Consultant	Oct 2025 – Present
Key Project: Ogun State Community, Social Orientation and Safety Corps	sosafecorps.og.gov.ng
Full-Lifecycle Development: Planned, redesigned, built, and successfully deployed the official web platform for an Ogun State security agency, meeting strict government digital standards. Remote Client Collaboration: Managed the entire 3-month development phase entirely remotely, ensuring seamless communication and alignment with agency stakeholders. Security & Performance: Implemented robust data protection measures and performance optimizations to ensure the site handles public traffic securely and efficiently. Ongoing Management & Scaling: Retained post-launch (Jan 2026) as the lead technical manager to handle server uptime, security patches, and continuous platform scaling.	

PROJECTS

TPC Logistics — Logistics Platform	Live in production
tpc-logistics-test.onrender.com	
Tech Stack:	HTML, Tailwind CSS, JavaScript
- Built a focused logistics landing page with clear service highlights and a WhatsApp lead capture flow that makes it easy to request a pickup or quote on any device. - Mobile-first inquiry funnel designed to turn visitors into leads. - Live in production with uptime monitoring so the site stays fast for real visitors.	
E-Commerce Store	Coming soon
Tech Stack: MongoDB, Express.js, React.js, Node.js, Tailwind CSS	
- Designed and developed a fully responsive multi-vendor e-commerce site to improve digital presence and drive conversions for businesses. - Owned the full build — from responsive storefront UI to product and vendor flows — delivering a seamless experience across mobile and desktop devices.	

Tech Stack:

React, Node.js, Express, MongoDB

- An education web application that helps educators and institutions manage and track student progress — assignments, performance, and insights in one clean, fast interface.
- Student progress and assignment tracking with a clean, classroom-first interface — built for real educators, not jargon.
