

Ferdinard Ashonibare

Fullstack Engineer & SaaS Builder

+2349137360986 | ferdinardoluwajuwonlo@gmail.com | github.com/lconvibes | ferdinardashonibare.com | Lagos, NG

SUMMARY

Fullstack Engineer & SaaS Builder building secure, scalable products.
Creator of EduTrack — a multi-tenant school SaaS architected for 300k students — and StackForge, an AI template generator.
Stack: Next.js 16, TypeScript, MongoDB, JWT, Redis, Docker. Security-first. 669 passing tests.

PROJECTS

Code: github.com/lconvibes

EduTrack — Multi-Tenant School Management SaaS

School-management SaaS: student records, grades, attendance, and analytics — data isolated per school.

Demo: (add live URL) · Repo: (add repo URL)

- Architected a TypeScript Next.js 16 + MongoDB platform with per-school data isolation, designed to scale to 300k students.
- Implemented AES-256-GCM field-level encryption for student PII and JWT stateless auth with token revocation.
- Built Redis caching and per-tenant rate limiting, load-tested with k6; 669 passing tests (node:test) run in CI on every push.
- Containerized with Docker and automated backup/restore scripts for zero-downtime production deploys.

StackForge — AI-Powered Starter Template Generator

"V0 for backend" — a prompt becomes a production-ready Next.js + DB + Auth starter.

Demo: (add live URL) · Repo: (add repo URL)

- Building "V0 for backend": 1-click generation of production-ready TypeScript Next.js + DB + Auth templates.
- Enforcing a 20-point security checklist on every generated template so default vulnerabilities can't ship.
- Prioritizing developer experience, secure-by-default architecture, and multi-tenancy safety in every generated app.

Wura Grand Hotel — Premium Hotel Website

Refined, brand-led hotel website — room and suite showcases and booking journeys built to turn first impressions into reservations.

Live: wura-y0y5.onrender.com · Stack: React, Tailwind CSS, Node.js

- Designed and shipped a premium, mobile-first hotel website focused on driving direct reservations on any device.

EXPERIENCE

Codeferd Digital — Freelance Fullstack Engineer & Consultant

Oct 2025 – Present

- Built and shipped the official web platform for Ogun State So-Safe Corps, a state security agency — owned end-to-end and deployed to strict government digital standards (sosafecorps.org.gov.ng).
- Delivered the full 3-month build remotely against a fixed government deadline, with weekly stakeholder reviews on security, accessibility, and performance.
- Implemented a security-first architecture with access control and performance tuning — measured in production (Lighthouse, Aug 2026): accessibility 89/100, SEO 100/100, 120 ms server response.
- Retained post-launch (Jan 2026) as lead technical manager: uptime, security patching, and continuous platform scaling.

TECHNICAL SKILLS

Frontend: Next.js 16, React 19, TypeScript, JavaScript, HTML5, Tailwind CSS v4, jsPDF, html2canvas, Lucide React
Backend: Node.js, MongoDB, Mongoose 9, JWT, bcrypt, REST APIs, Zod Validation
DevOps: Docker, Docker Compose, Redis, k6, Git, Vercel
Security: AES-256-GCM, Rate Limiting, CSP Headers, Input Validation, OWASP Top 10
Tools: ESLint 9, node:test, Nodemailer

EDUCATION

Diploma in Frontend Engineering — Alt School Africa, Lagos (2025) — Full-Cycle Web Development, React.js
Diploma in Web Design — HIIT Plc, Lagos (2024) — Responsive Web Design, UI/UX Principles
Senior Secondary School Certificate (S.S.C.E.) — Surulere Senior Secondary School, Lagos (2021)
